

Energy Conservation Day 2021

December 14, 2021

December 14 of every year is observed as Energy Conservation Day by all Centres of IET as part of Energy Conservation week celebrated all over India.

The Energy Conservation Act 2001 provides for efficient use of energy and its conservation. The Bureau of Energy Efficiency is a constitutional body established under this Act on 01 March 2002 to assist in the development of policies and strategies to reduce the energy intensity of the Indian economy.

National energy conservation day in India is celebrated to showcase India's contribution to energy conservation and steps taken towards becoming an energy efficient Nation. Energy conservation is using less energy for the same work and avoiding the unnecessary usage of energy. Using energy efficiently is very necessary to save it for the future. Energy conservation should be rooted in the behaviour of every human being.

Objectives of Energy Conservation Day:

- It is celebrated to send the message of importance of conserving energy in every walk of life among people.
- Promoting the process of energy conservation by organizing a lot of events such as discussions, conferences, debates, workshops, competitions etc all through the country.
- Goal is to reduce demand, protect and replenish energy supplies, develop and use alternative renewable energy sources and to clean up the damage from the prior energy processes.
- Encourage people to install energy efficient devices, fix air leaks, use maximum daylight, energy audit, switch off appliances when not in use, use energy efficient windows, use bicycles rather than fuel driven vehicles etc.
